## **DETAILED ACTION**

### ***Response to Arguments***

1. In light of the significant amendments to the claims, a new restriction requirement is found to be necessary, it follows below. The restriction requirement dated 3-3-2006 is hereby withdrawn.
2. With regard to the remarks filed 12-30-2005, responding to them is moot while pending an election.

### ***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 31-32 and 37-40, drawn to a method of operating an optical communication system by monitoring an OSC, classified in class 398, subclass 33.
  - II. Claims 1-30, 33-36 and 41-42, drawn to an optical fiber amplifier with specific pumping mechanisms, classified in class 359, subclass 341.3.
4. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP §

Art Unit: 3663

806.05(e)). In this case the methods may be performed on apparatus employing OTDR.

5. Upon election of one of the inventions I or II above, applicant is required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

- A. The embodiment as set forth in figure 16.
- B. The embodiment as set forth in figure 18.
- C. The embodiment as set forth in figure 21.
- D. The embodiment as set forth in figure 22.

6. Upon election of one of species A or B above, applicant is required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

- a The embodiment as set forth in figure 25.
- b The embodiment as set forth in figure 26.

7. Upon election of one of inventions I or II above, applicant is required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits

Art Unit: 3663

to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

(1) The method as set forth in figure 14.

(2) The method as set forth in figure 15.

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
